EPIGENESIS

Redefining AI with EpiGenesis

EpiGenesis is a platform that has been meticulously designed to deliver high-speed, tailor-made solutions that cater to individual needs through its intelligent, adaptive algorithms that learn, comprehend, and evolve with each interaction providing a highly personalized experience. It is a catalyst for growth, a driver of innovation, and a partner in your journey towards achieving unrivaled business excellence.

Our unparalleled, intuitive user interface puts the user in the driver's seat. By leveraging cutting-edge technology, EpiGenesis also enshrines data security, immutability, and transparency in its operations. Whether it's designing workflows, integrating data, or crafting automated sequences, EpiGenesis is as user-friendly, sophisticated, and as secure as it gets. Redefine what's possible with EpiGenesis.

Applying EpiGenesis

We offer distinct value in four ways:

1 **We build AI-driven apps for you.** With EpiGenesis at the core, you launch the adaptive ability of a platform that learns and adjusts to your users' individual profiles and needs in real-time delivering a tailored AI experience to every user.

2 **We integrate with your apps.** App integration with EpiGenesis expands the power of your apps to leverage the latest AI features as they are discovered and developed. This eliminates the need for software integration and development costs to your business by utilizing a highly specialized, frictionless "plug and play" process.

3 **We deploy** a highly specialized instance of EpiGenesis designed specifically for exceeding the enhanced security needs of highly regulatory environments. This secure deployment offers the capacity to create new capabilities specific for your business, your industry, and your team.

4 **We deliver a digital playground** where the only limitation is your imagination. Each Creator (rather than "Developer") account allows every individual the power to redefine possible by using the power of AI to aspire to greater endeavours and accelerate your journey to success.

What sets it apart

EpiGenesis offers unrivaled privacy and personalization while tapping into real-time insight.

Industry-leading security & privacy

EpiGenesis offers industry-leading security specialized for highly regulatory environments protecting your privacy and securing your data. Our technology gives you full ownership and control of your data.

Next-level personalization

EpiGenesis is trained using your personal data, with the ability to upload your own content which helps limit bias while delivering hyper-personalized recommendations and answers.

Real-time data & insights

Unlike other AI solutions, EpiGenesis accesses real-time data and insights to help provide the most relevant and up-to-date responses to your requests and queries.

Our Audiences

Enterprise Customers

Highly-Regulated Organizations
Large commercial businesses in highly-regulated industries who have significant compliance, risk, security, and privacy & IP protection requirements.

Government Agencies (Federal, State, and Local) who either need their own AI platform instance or to access the power of EpiGenesis without losing possession, control, and/or ownership of their critical data.

Entrepreneurs & Investors

Startups and entrepreneurs in every industry seeking to build AI-driven products for sale or consumption at scale; to provide as a service to clients and users; and/or to augment their own operations with more powerful productivity tools

Venture Capital, Private Equity, Family Offices, and Individual Investors seeking to engage EpiGenesis to provide value to portfolio companies.

Creators

Individuals seeking to express, conceptualize, or launch any digital idea.

We offer Creators the capacity and space to make art, build products, create digital twins, and many other things we've yet to imagine ourselves.

Accessing EpiGenesis and Generating Revenue

EpiGenesis can be accessed in three ways:

01. Project-By-Project:
We charge a Fee for Service on engagements with Epigen to Build, Integrate, and/or Deploy EpiGenesis.

02. Transactions:
We offer paid access to the EpiGenesis platform. Fees are calculated based on platform transactions.

03. Licensing:
We offer a license fee for "Deployment" to a customer space.
